

Educational Services

Education can be provided for a number of reasons to a group or on a one-on-one basis. We offer several programs that are already developed or if you have a particular need or topic that you would like for us to develop for your office we can customize one to fit your needs.

Educational Programs Include:

Ask A Consultant - One-on-One, Group or Webinar Based Education

- Customized educational programs designed to fit your practice needs. Some of our educational programs are both CME and CEU approved.

Developed Programs include:

- Chart Auditing
- Coding Boot Camp
- Compliance
- E/M Documentation
- ICD-10
- MACRA: MIPS/APMS
- Specialty Coding Workshop

One-on-One or Group Education following a Baseline Records Review

- In most cases once a records review has been done your office will want to have a comprehensive training program this type of education allows for the opportunity to review the report and can discuss the errors and suggestions for compliance measures with your consultant. It's our goal to not only make you aware of practice errors but to help you better understand why there are errors and what necessary steps are needed to correct them.
