

Practice Assessment Service

Measuring your practice’s performance and effectiveness is a critical component of effective and successful practices. The Physicians Practice S.O.S. Group® will provide a tailored assessment of your practice’s finances and/or operational performance and provide you with a blue print for achieving a greater efficiency and profitability.

Because each medical practice is unique with different consulting needs, our assessment projects are tailored to focus on those specific areas of concern to the client.

A practice assessment checklist tailored to the client's specific consulting needs is the primary tool utilized for assessing the operational areas included in the project.

Our practice assessment report explains how the identified problem or deficiency affects operations, practice cash flow and/or profitability; offers recommendations for changes or improvements that should be implemented to resolve the identified problems; and discusses options on how to implement the recommended action(s).

Our Practice Assessment Service reviews the following areas:

- Assessment of Accounts Receivable
- Staff Productivity, Capacity & Staffing
- Scheduling, Patient Access & Patient Satisfaction
- Patient Flow, Operational Efficiency & Office Organization
- Coding, Reimbursement & Medical Records
- Patient Billing, Insurance Processing & Collections
- Compliance (HIPAA, OSHA)
- Personnel Interviews and Surveys of Physicians, Nurses & Staff
- Assessment of Facility & Equipment
- Information Systems & Technology Needs and Performances for such
